

K5 / Kindergarten

Romans 12:1

"I appeal to you there, brothers, by the mercies of God, to present your bodies as a living sacrifice, holy and acceptable to God..."

Kindergarten at CLA is focused on growing academically, socially and spiritually in a grace-filled and fun environment.

Emily Perrin

Mrs. Perrin graduated from Florida State with a degree in Elementary Education and Reading certification. She has done a variety of work in education with children preschool through elementary school, but is extremely thankful to be at CLA with her family. She has two daughters who attend CLA and has been a part of the CLA team for 3 years. One of her favorite parts of the school day is starting with Morning Worship!

"Do not be conformed to this world, but be transformed by the renewal of your mind, that by testing you may discern what is the will of God, what is good and acceptable and perfect."

Romans 12:2

Lacy Sampson

Mrs. Sampson has been teaching at CLA since 2019, and has been working in education since 2011. She graduated from FSU with a degree in Elementary Education and a certification in ESOL. She enjoys teaching Kindergarten because of the unique opportunity to help young students grow spiritually, academically, and socially.

BIBLE & CHARACTER

The students are taught beginning Old Testament stories and truths, as well as important character traits such as honesty, love, and thankfulness.

READING

Using Abeka Phonics program, students grow from simply identifying letters and sounds to reading short and long vowel words and sentences with fluency and expression.

MATH

Kindergarten students learn foundational concepts of counting, number sense to 100, shapes, ideas of greater/less, and simple adding and subtraction.

SCIENCE & SOCIAL STUDIES

Unit studies are used as the basis of our science and social studies learning. In the fall, we learn about senses, nocturnal animals, the first Thanksgiving, and Christmas in other countries. We visit the Tallahassee Museum to give up close experience with the animals we've studied. In the spring, we cover basic health, safety, and manners. We finish the year with a unit about ocean animals and bees, including trips to the Gulf Specimen Marine Lab and a local beehive.

WRITING

Students will master letter formation and emergent writing skills.
